Frontend Technologies: React.js, Vite, HTML, CSS

Backend and Server-Side: Node.js, Express.js, RESTful APIs

Databases: Redis, SQL

Other Tools and Concepts: Postman, JSON, Full stack development, Blockchain

PROJECTS

Aarogya Saarthi

Jan 2025 – Feb 2025

AI-powered Healthcare System (Team of 5)

Python, React.js, MongoDB, Node.js, Blockchain, AI/ML

- Architected a full-stack healthcare platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) to streamline medical resource management.
- Engineered and deployed 7 distinct AI/ML models using Python and TensorFlow
- Implemented a secure, blockchain-based module using Solidity for transparent salary processing and developed a real-time patient prioritization algorithm.

Edura

June 2025 – Present

ERP System

React, Node.js, SQL

- Developed a scalable, containerized RESTful API using Node.js, Express.js, and Docker to perform real-time sentiment analysis on text data
- Built secure authentication and authorization
- Role based data access policy

EXPERIENCE

JHU Hackathon – VIT Bhopal and Johns Hopkins University, USA

Feb 2025

Finalist

Bhopal, MP

- Competed against 250+ teams from 190+ universities worldwide
- Achieved a high ranking, placing among the top teams despite hardware-focused projects securing the top 10 spots
- Developed Aarogya Saarthi, an AI-powered healthcare system, as part of the hackathon.
